## Multiple industries. Multiple markets. One name - DFPCL.

Deepak Fertilisers and Petrochemicals Corporation Ltd. (DFPCL) enjoys pride of place among India's leading producers of industrial chemicals and fertilisers. Set up in 1979 as an Ammonia manufacturer, DFPCL has grown to become a publicly listed, diversified Indian conglomerate with a product portfolio spanning industrial chemicals, bulk and speciality fertilisers, farming diagnostics and solutions, technical ammonium nitrate (TAN) and value-added real estate, and an annual turnover of over 800 million USD.

DFPCL has state-of-the-art manufacturing facilities in Talaja (Maharashtra), Srikakulam (Andhra Pradesh), Panipat (Haryana) and Dahej (Gujarat), where cutting-edge technologies are employed to ensure world-class products that meet the most stringent global standards. It has established a prime position for itself over the last four decades across Indian and global markets.

The Company has manufacturing facilities in Talaja – Maharashtra, Srikakulam – Andhra Pradesh, Panipat – Haryana and Dahej – Gujarat. The Company has adopted some of the global state-of-the-art technologies that enable it to manufacture and supply high-quality products that meet global standards.

DFPCL today is a name that spells quality and trust. It has established a prime position for itself over the last four decades across Indian and global markets. Focused on growth, drawing synergies from its existing products and leveraging current strengths, DFPCL is augmenting its manufacturing capabilities to expand its product portfolio. DFPCL is directed towards shaping a successful growth trajectory in the dynamically changing world of business. It is building resilience to spearhead change through the swiftly transforming world economy.

The focus is to create value. Whether integrating backwards into raw materials or integrating forward to bring sectoral depth to its strategies, the Company is committed to propelling itself into a new and exciting orbit.

## DFPCL. The undisputed leader in Isopropyl Alcohol.

DFPCL is the leading producer and marketer of Iso-Propyl alcohol (IPA) in South Asia since 2007 with an installed capacity over 70,000 MTPA at Talaja, Maharashtra. DFPCL manufactures IPA through an extremely efficient and environment friendly, direct hydration process, producing a colorless product of high purity, with no undesirable odor or by-product formation. The product meets international quality standards for use in pharmaceuticals, coatings and inks, specialty chemicals and cosmetics. DFPCL IPA conforms to the highest standards of Indian Pharmacopoeia (IP), European Pharmacopoeia (EP), British Pharmacopoeia (BP), US Pharmacopoeia (USP) and Chinese Pharmacopoeia (CP) and meets various standards like OSHAS's, FDA, CFDA, HALAL & KOSHER etc. Most of the major pharma companies like Dr. Reddy, Serum institute, Cipla, Zydus Cadila, Sun Pharmaceuticals, Aurbindo Pharma, Mylan Laboratories, Hetero drugs and many more have been using our IPA for critical applications like API and formulation applications, disinfection of manufacturing area, etc. Our product is also well accepted in various markets such as USA, EU, Africa, Middle East and Far East. With Cororid®, DFPCL has forayed into IPA-based hand sanitizers, disinfectants and wipes.

## Cororid® Disinfection Solutions. For 'Complete protection. Complete peace of mind.'

**Cororid® Disinfection Solutions**, provides a complete range of broad-spectrum disinfection solutions, microbiologically tested and certified under one roof for keeping pathogens at bay. Cororid® Disinfection Solutions are powered by Indian Pharmacopoeia (IP) grade IPA, the world's most preferred active ingredient in hand sanitizers and other disinfection products that provides effective and reliable protection against bacteria, fungi and viruses, including the Coronavirus.

The Cororid® Disinfection Solutions range includes Hand Sanitizers / Hand Rubs, Skin Antiseptics, Rapid Surface Disinfectants, Broad Spectrum Disinfectants (for floor mopping, spraying and fumigation), Bodywipes, etc.

### Different solutions to suit multiple industries

**Cororid® Disinfection Solutions** have been formulated for use in wide range of industries such as Healthcare, Industrial, Food & Beverage, Hospitality, Commercial, Education, Facility Management, etc.

### DFPCL. Growth is in our DNA.

Focused on growth, drawing synergies from its existing products and leveraging current strengths, DFPCL is augmenting its manufacturing capabilities to expand its product portfolio. DFPCL is directed towards shaping a successful growth trajectory in the dynamically changing world of business. It is building resilience to spearhead change through the swiftly transforming world economy.

The focus is to create value. Whether integrating backwards into raw materials or integrating forward to bring sectoral depth to its strategies, DFPCL is committed to propelling itself into a new and exciting orbit. Cororid is the latest manifestation of forward integration that takes DFPCL closer to the Indian consumers, spread across the length and breadth of the country.

## DFPCL. Committed to the environment.

DFPCL maintains high standards of Safety Health & Environment. It is accredited with the prestigious ISO 9001:2000, ISO 14001:2004 and OHSAS 18001:2007 certifications. It maintains strict adherence to the regulatory requirements and standards of the State Pollution Boards and Federation of Indian Industries.

It is committed to its endeavour towards adopting cleaner technologies for environmental protection. It has the 'Clean Development Mechanism' (CDM) project at its manufacturing plant in Taloja which addresses the widespread concern on global warming, by reducing the Green House Gas (GHG) emission. It has an Effluent Treatment Plant which operates continuously to treat the wastewater.

## WHO Guidelines on Hand Hygiene in Health Care

Hand hygiene is one of the most effective ways to prevent the spread of infections. It is a simple but crucial step in protecting patients and healthcare workers. The World Health Organization (WHO) provides guidelines on hand hygiene in health care to ensure that everyone follows the same standards.

Hand hygiene should be performed at five key moments: before and after patient contact, before and after clinical procedures, and after contact with patient surroundings. This helps to reduce the risk of contamination and infection.

Hand hygiene should be performed using either alcohol-based hand rub or soap and water. The WHO recommends a specific technique for hand hygiene to ensure it is effective.

Hand hygiene is a critical part of infection control. It is a simple but crucial step in protecting patients and healthcare workers. The WHO provides guidelines on hand hygiene in health care to ensure that everyone follows the same standards.
